

PRESS RELEASE**Zamil AC Announces Collaboration with Synexis® for Air and Surface Cleaning Technology in Saudi Arabia and GCC.****RIYADH, Saudi Arabia**

Zamil Air Conditioners, a pioneering air conditioning manufacturer with a legacy spanning 49 years in Saudi Arabia, is thrilled to announce a groundbreaking collaboration with US-based technology company, Synexis. This collaboration marks a significant stride in Zamil AC's commitment to providing innovative air conditioning solutions across various sectors in the Kingdom of Saudi Arabia.

Synexis is a leading innovator, dedicated to advancing indoor environments and is recognized in the Indoor Environmental Quality (IEQ) sector for its commitment to sustainable and secure approaches to mitigating harmful pathogens.

Dry Hydrogen Peroxide (DHP®) technology redefines air quality solutions, especially in sectors requiring cleaner environments such as hospitals, schools, poultry farms, and high-density living-working environments. Zamil AC, renowned for its dedication to quality and innovation, has secured a Memorandum of Understanding with Synexis, positioning Zamil AC towards a strategic partnership and becoming the exclusive partner to produce, sell, and service Synexis products in GCC.

This collaboration underscores Zamil AC's magnificent role as a regional company in introducing beneficial technologies to Saudi society. It is a testament to Zamil AC's unwavering commitment to adding value to the community. Zamil AC aims to leverage this collaboration to provide a new leap in air quality solutions in Saudi Arabia, reinforcing its position as a leader in the air conditioning industry.

The collaboration with Synexis aligns with the Zamil AC vision to continually enhance the quality of indoor environments for the people in the Kingdom through advanced and sustainable solutions.
