

## Synexis LLC Announces Partnership with Diversey

*Diversey to Distribute Synexis' Innovative Dry Hydrogen Peroxide (DHP®) Technology, Enhancing Microbial Reduction Solutions*

**Lenexa, Kan.** – September 24, 2024 – Synexis LLC has announced a strategic partnership with Diversey, a Solenis company, to distribute Synexis' cutting-edge Dry Hydrogen Peroxide (DHP®) technology to customers in the healthcare sector across the United States and Canada.

Synexis' patented DHP technology continuously reduces the presence of viruses, bacteria, mold, and volatile organic compounds (VOCs) in occupied spaces, providing a proactive approach to improving indoor air and surface quality. This innovative solution operates 24/7, offering continuous reduction in real-time.

"Emerging pathogens and increased demand for resource-efficient solutions are driving the need for continuous and touchless microbial control technologies," said Dennis Doyle, CEO, Synexis. "This collaboration with Diversey allows us to bring a comprehensive microbial reduction solution to our customers."

"Combining Synexis' DHP technology with Diversey's comprehensive cleaning and hygiene solutions will offer customers an unmatched level of microbial control and safety," added Ed Connors, Chief Business Officer, Solenis. "We are excited about this partnership and its potential to help our customers achieve operational goals while creating cleaner and safer environments."

This partnership marks a significant milestone for both companies as they work together to meet the growing demand for advanced microbial reduction technologies. Synexis products will be available through Diversey's distribution network in the coming months.

### **About Synexis**

Since 2008, Synexis has been committed to continuously cleaning the air we breathe and the surfaces we touch. Synexis is an industry leader in touchless and continuous microbial reduction of occupied spaces. Our innovative Dry Hydrogen Peroxide (DHP®) fights viruses, bacteria, mold, and VOCs. Our patented devices have undergone rigorous testing by Underwriters Laboratories (UL) and were certified to meet UL2998 for zero ozone emissions and can run 24/7 within occupied spaces.

Synexis devices provide DHP coverage to more than 40 million square feet of indoor spaces in a variety of industries such as Healthcare, Education, Sports & Recreation, Food Services, Food Safety, and many more. Synexis systems are regulated by the US

Environmental Protection Agency and state governments. Synexis devices are produced in EPA-registered facilities and packaged and labeled in accordance with EPA regulations appearing at 40 CFR 152.500.
